

Authored by **Jane Doe** for the *Modern Markdown Editor* team on May 11, 2026.

Introduction

This document is rendered server-side by the `modern-markdown-editor-api` service. It uses the same Typst compilation pipeline as the desktop app, so anything that renders in the editor renders here too:

- Lists like this one
- inline code
- Links
- Math: $E = mc^2$

Code

```
1 function greet(name: string) {  
2   console.log(`Hello, ${name}!`);  
3 }
```

Alerts

NOTE

Need to reference a value from the request? Use `{{var:author}}`.

TIP

Templates can be uploaded as `.mdt` files exported from the editor.
